

D.C. Healthcare Project

An estimated **\$125B** is lost by healthcare systems each year due to underpaid claims; and that was before the current crisis. Wellness Wishes is the perfect vehicle to easily and efficiently reclaim lost revenue for local hospitals and healthcare facilities, **while generating much-needed funds for the communities in which they serve.** Which is why we have initiated our D.C. Healthcare Project.

Get involved in the project to recoup lost, unrealized money for your organization, while financially contributing to the prospective D.C. Project with no out-of-pocket expenses. Your involvement will provide for the underserved and less fortunate members of the community, including veterans, seniors, children (particularly single-family households) and other segments of the population. **YOU have the power to make this happen! HOW?** Contribution is laid out in four easy steps:

1 A partnership between our organizations would begin with your own claim's recovery project

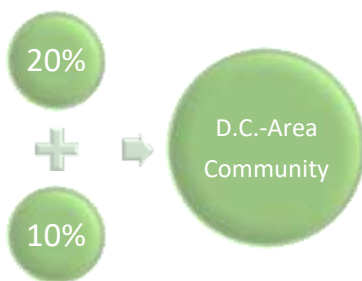

2 Our team of Funding Advisors does all the work from data collection, analysis, reconsideration efforts, and recovery of funds

3 Significant funds are returned to your healthcare organization; Wellness Wishes only takes a fee on money that we help recover

4 We then allocate a portion of our fees to fund the D.C. Healthcare Project with future plans for growth, including community centers and healthcare resources; while another portion is allocated to a Community Response Fund to help combat the current healthcare crisis

EXAMPLE BREAKDOWN OF POTENTIAL FUNDING:

- \$100M revenue hospital
- 10% revenue recovered = \$10M
- Hospital retains \$5M
- WW invoices \$5M
- \$1.5M is infused into the community by WW

JOIN US in helping rebuild a healthier future for the greater good! The current D.C. Healthcare Project budget includes an initial annual start-up cost of \$4.4M. Business model, project elements, claims recovery project and further details available upon request, or simply contact us to schedule a call to answer all your questions, strategize and start facilitating funding for your organization and YOUR community!
